Resource Management
For
Companies on the Move

Ops Manager[TM] is a resource management program designed to provide companies the ability to better control and track projects, and maintain budgets for their: developers, consultants, trainers, telecommuters or temporary staff. Ops Manager[TM], unlike other software, is a fully functioning system. It is specifically designed to be affordable, versatile, and usable by any company and any industry. Ready "out-of-the-box" or Ops Manager[TM] can be customized to fit your particular needs.

By incorporating all the necessary information requirements into Ops Manager[TM], we deliver an Enterprise Application Integration (EAI) solution at a cost that any company can afford!

Functions and Modules of Ops Manager[TM] include:

Project Administration/Accounting - Empowers Project Manager (PM)
- Manage Account, Project, and Task Info
